

# UNIT - 3

Data Compression

Memory Management.

## Compression Techniques:

(Zipping)

- ① Huffman Encoding.
- ② Run - Length Encoding.
- ③ Ziv - Lempel Encoding  
(ZV77)

# ① Huffman Coding.

Not an example of Huffman Encoding

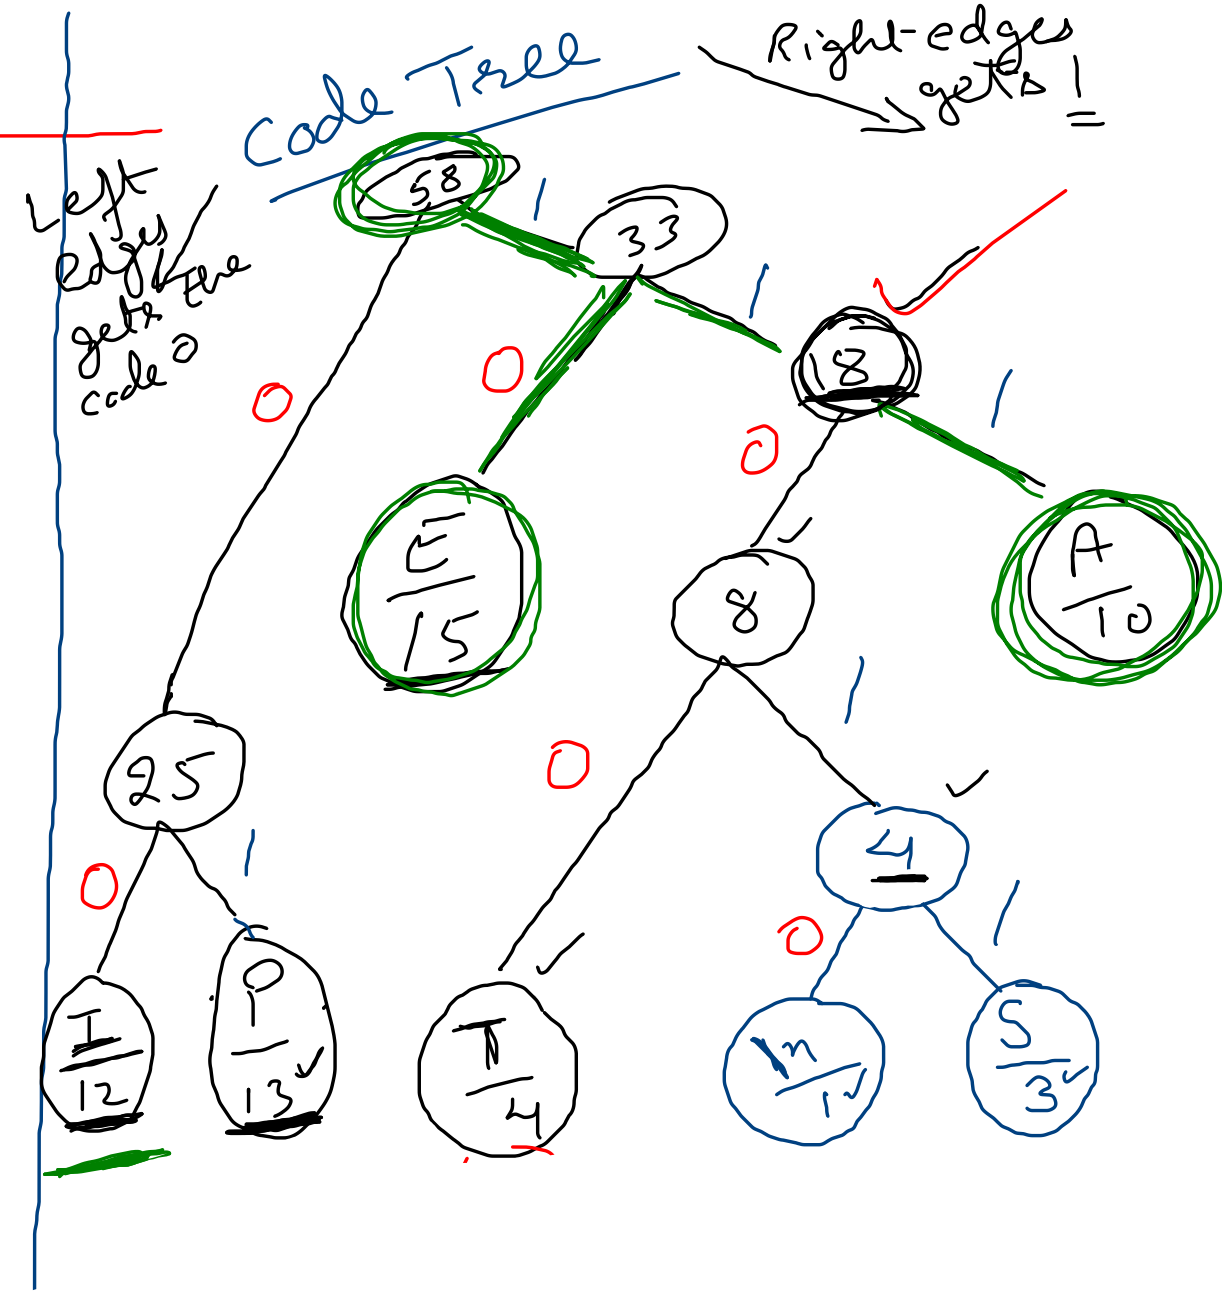

000 010 010 001 ...  
(A) I I E S I P I A E P T

| Char           | Code         | <u>Fixed Length</u> | Freq.         | Total Bits     |
|----------------|--------------|---------------------|---------------|----------------|
| <u>(A)</u> ✓   | <u>000</u> ✓ | <u>(3)</u> ✓        | <u>(10)</u> ✓ | <u>(30)</u>    |
| ✓ → <u>E</u> ✓ | 001 ✓        | <u>(3)</u>          | <u>(15)</u> ✓ | <u>(45)</u>    |
| <u>I</u> ✓     | <u>010</u>   | <u>(3)</u>          | <u>(12)</u>   | 36 ✓           |
| <u>S</u> ✓     | <u>011</u>   | 3                   | <u>(3)</u>    | 9              |
| <u>T</u> ✓     | 100          | 3                   | 4             | 12             |
| → <u>P</u> ✓   | 101          | 3                   | <u>(13)</u>   | 39             |
| <u>m</u>       | 110          | 3                   | <u>(1)</u>    | 3              |
|                |              |                     |               | <u>(174)</u> ✓ |

Huffman  
 → Variable length code

| chars | Var. length Code | Length | Freq. | Total Bits-     |
|-------|------------------|--------|-------|-----------------|
| A     | 111              | 3      | 10 ✓  | 30              |
| E     | 10               | 2      | 15    | 30              |
| I     | 00               | 2      | 12    | 24              |
| S     | 11011            | 5      | 3 ✓   | 15              |
| T ✓   | 1100             | 4      | 4 ✓   | 16              |
| P     | 01               | 2      | 13    | 26              |
| n     | 11010            | 5      | 1 ✓   | 5 ✓             |
|       |                  |        |       | <u>146 bits</u> |

# Example - 2:

| chars - | Freq        | Var. Len. code | Len. | Total Bits - |
|---------|-------------|----------------|------|--------------|
| a       | <u>45</u> ✓ | 0              | 1 ✓  | 45           |
| b       | <u>13</u> ✓ | 101            | 3    | 39           |
| c       | <u>12</u> ✓ | 100            | 3    | 36           |
| d       | <u>16</u> ✓ | 111            | 3    | 48           |
| e       | <u>9</u> ✓  | 1101           | 4    | 36           |
| f       | <u>5</u> ✓  | 1100           | 4    | 20           |
|         |             |                |      | <u>224</u>   |

## ② Run Length Encoding:

A run is defined as a sequence of identical characters.

eg:-  $s = \text{aaabba}$  → 3 runs

encoded form is a pair  $(n, \text{ch})$  character.  
no. of consecutive same chars.  
for 3a2b1a ✓ aaabba

eg:- 2.  $s = (nnn \text{ *** } \& \text{ / / / / / / / / / /})$  → 3n 3\*1&7/  
Encoded form.

Problem: eg:-  $s = 1111111111544444$   
encoded form → 1111554 Sol: In place of n we can use ASCII char.  
eg:- 43 consecutive 1's  
ASCII code → +1 ✓ ✓

## Quick Quiz

① Huffman coding uses \_\_\_\_\_ length codes:

- ✓ A) Variable
- B) Fixed.

② Generate a Run Length code for the following message:

aaaa # # ! ?? bbb

A) 4b 2# 1! 3? 2b

✓ B) 4a 2 # ! 2? 3b ✓

C) ab3A bB

### ③ ZIV-LEMPERL Code

Universal Compression.

In earlier methods:

- Prior knowledge is required.
- Whole message needs to be encoded.

1277

- Buffer of symbols

Code word

| Input/Message                                  | Buffer  | Code Transmitted |
|--|---|------------------|
| <u>a a b a b a c b a a c b a a d a a a ...</u> | <div> <div>aaaa</div> <div>0 1 2 3 4 5 6 7</div> </div> | <u>a</u>         |
| <u>a a b a b a c b a a c b a a d a a a ...</u> | <u>a a a a a d b a</u>                                  | <u>2 2 b</u>     |
| <u>a b a c b a a c b a a d a a a ...</u>       | <u>a b a c b a a c</u>                                  | <u>2 3 c</u>     |
| <u>b a a c b a a d a a a ...</u>               | <u>c b a a c b a a</u>                                  | <u>1 2 a</u>     |
| <u>c b a a d a a a ...</u>                     | <u>c b a a c b a a</u>                                  | <u>0 3 a</u>     |
| <u>d a a a ...</u>                             | <u>c b a a d a a a</u>                                  | <u>3 0 d</u>     |
| <u>a a a ...</u>                               |   |                  |
